Hazardous Weather

Day 1 Weather Hazards

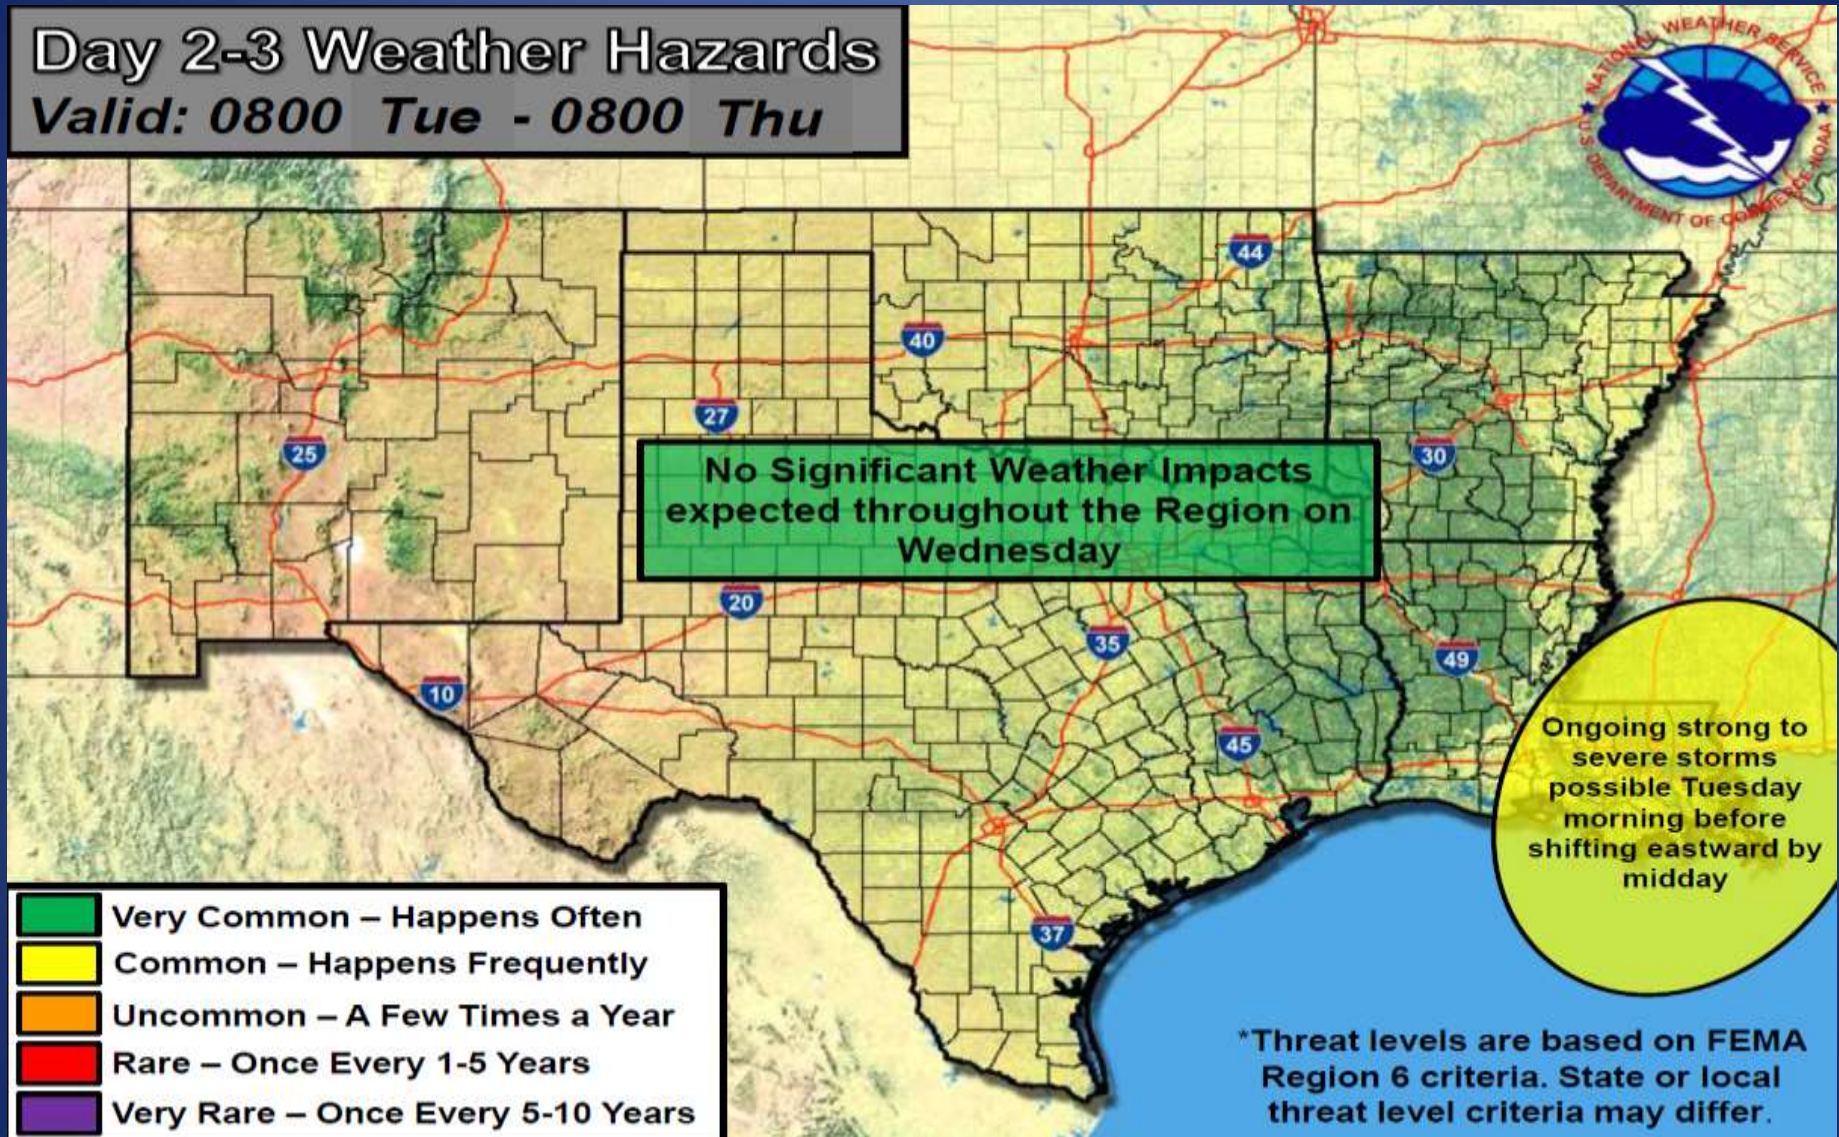

Valid: 0800 Mon - 0800 Tue

Hazardous Weather

Day 2-3 Weather Hazards

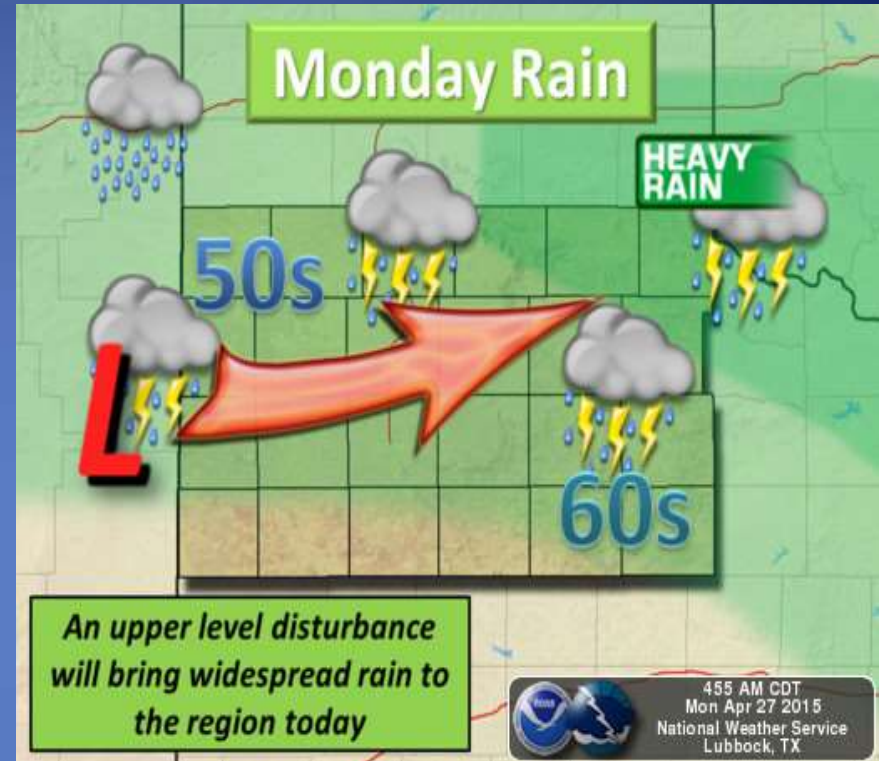

Valid: 0800 Tue - 0800 Thu

Hazardous Weather

A strong cold front will move south through the area today, with a chance of showers and non-severe thunderstorms and gusty winds behind it.

A slow moving upper level disturbance will bring widespread rain and isolated thunderstorm chances today and this evening. Heavy rain could occur over the southeastern Texas panhandle into the northern Rolling Plains.

Hazardous Weather

Flash Flood Watch
IN EFFECT UNTIL 7 PM CDT MONDAY

Amarillo

Flash Flood Watch

National Weather Service - Amarillo

@NWSAmarillo

Issued: April 27, 2015 6:00 AM

YouTube /NWSAmarillo

Rain will continue through much of the day. While moderate to heavy rain is possible over all of the Texas and Oklahoma Panhandles, the highest rainfall totals are expected over the eastern half of the Texas and Oklahoma Panhandles. Thus a Flash Flood Watch is in effect for this area until 7 PM CDT. Remember if you see water cover the roads, turn around and don't drown!

Flood Potential Through Monday Evening
National Weather Service, Norman, OK

Areas most likely to see localized flooding through Monday evening

- Additional 1-3 inches rain possible
- Localized flash flooding
- River rises due to prolonged heavy rain

327 AM CDT
Mon Apr 27 2015
National Weather Service
Norman, OK

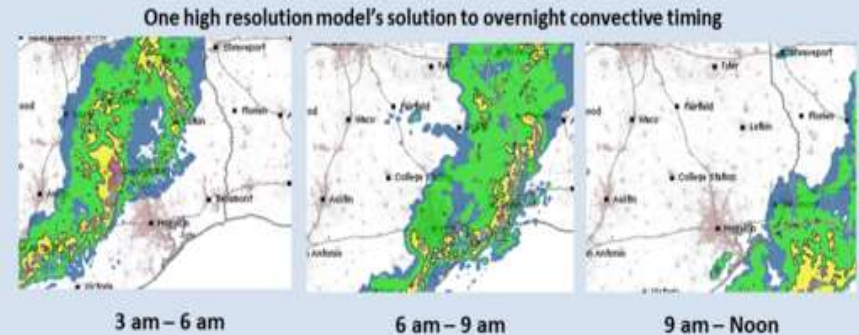

@NWSNorman | weather.gov/norman

Several more rounds of showers and storms are expected through late Tuesday. Some areas may pick up an additional 2 to 3 inches of rainfall. With the ground saturated in some locations, flooding may become a concern. Areas from west central through central and northwestern Oklahoma, and parts of western north Texas, look to have the better chance of localized flooding.

Hazardous Weather

Through Monday Morning.....

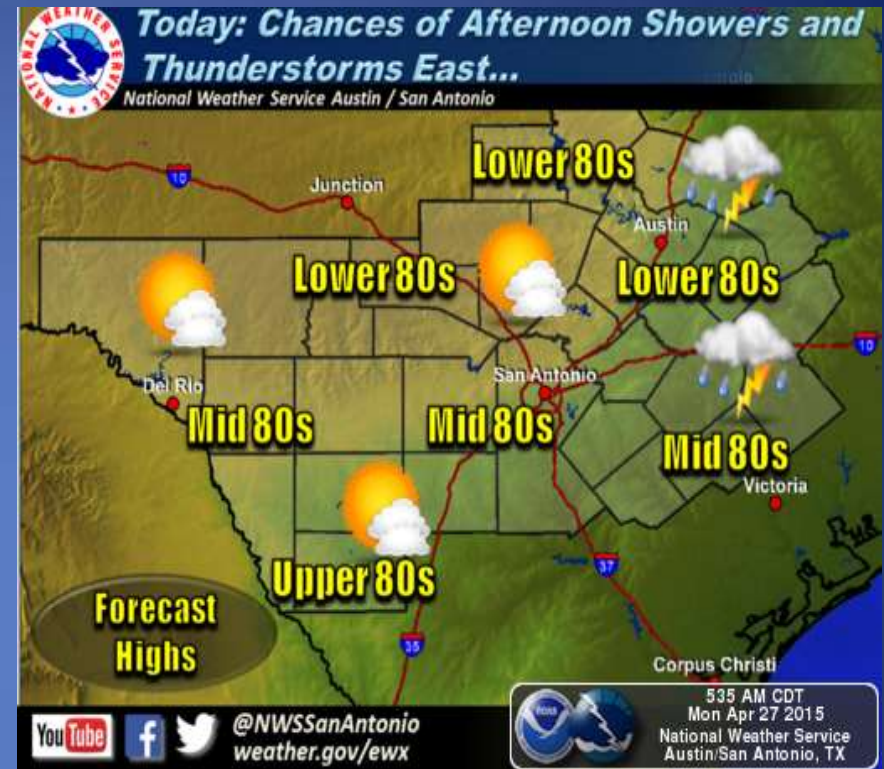

- A western Texas squall line moves through during overnight Monday morning hours.
- Numerous storms could quickly become severe with damaging winds, large hail and isolated tornadoes.
- Various models depict that many areas will experience storms Monday morning into early afternoon.
- Large cold core upper low could move over the region in the afternoon and re-blossom strong convection.

Another episode of severe weather will be possible early through mid Monday. This is one Sunday evening weather model's interpretation of the progression of the approaching western Texas squall line.

Hazardous Weather

A dry line will move across South Texas Today. Isolated to scattered showers and thunderstorms may develop in advance of the dry line. Drier air after dry line passage will contribute to hot maximum temperatures over the West this Afternoon.

There are chances of showers and thunderstorms this afternoon across the eastern areas of South Central Texas. Otherwise, partly cloudy skies and highs in the 80s are expected.

Hazardous Weather

Cooler Today

Highs/Rain Chances

A cold front will move south across the area Today.

Best chance for showers and thunderstorms will be across the Big Country and Heartland.

National Weather Service
San Angelo, TX
Updated: Apr 27 6:27 AM

A cold front will move across West Central Texas on Monday. This will result in highs in the 70s across the Big Country, with lower 80s expected throughout the Concho Valley and I-10 corridor. There is a potential for showers and thunderstorms along and north of a Sterling City to Brady line, but the threat for severe weather remains low.

605 AM CDT
Mon Apr 27 2015
National Weather Service
Fort Worth, TX

In the wake of last night's storms, cooler air has moved into the northern parts of the region behind a cold front. The upper level low responsible for the recent stormy weather will take a while to move through the region, so there will still be a chance of showers and a few thunderstorms over the area today. There is a small chance of severe weather confined to parts of central and southeast Texas where the air will remain warm and humid ahead of the front.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
04/26/15	Flood Warning	San Antonio River at Goliad affecting Goliad County; San Antonio River Near Elmendorf affecting Bexar and Wilson Counties; Guadalupe River at Bloomington and Victoria affecting Calhoun, Refugio, and Victoria Counties; Red River near DeKalb affecting Bowie County; Sulphur River below Talco and near Naples affecting Titus and Morris Counties; Black Cypress Bayou at Jefferson affecting Marion County; White Oak Creek near Talco affecting Titus County; Sabine River near Mineola affecting Wood County; Hardin, Jasper and Orange Counties
